

STIMULATING BRAINS X BRAIN CITY BERLIN

From Neurons to Networks in
Neuromodulation & Connectomics

Thursday
June 1
6 PM

Timon Merk
py_neuromodulation: A feature estimation and decoding
platform for brain implants

Colin McNamara

Manipulation of brain activity through closed-loop interaction

Friday
June 30
6 PM

Nanditha Rajamani
Toward symptom-specific deep brain stimulation

Lennart Verhagen

A new wave in neurotechnology

Thursday
July 13
6 PM

Elisa Lilly Garulli
Spinal cord stimulation to retune motor networks in rat
Parkinson's model

Charlotte Stagg

Oscillations and inhibition: Towards an understanding of
neurophysiology of motor learning

TBA

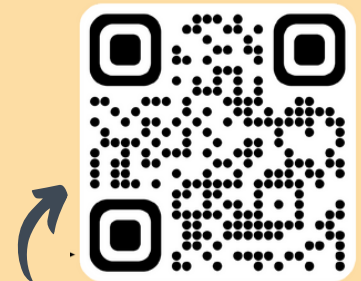

David Haslacher
Modulating brain oscillations using closed-loop transcranial
alternating current stimulation

Hayriye Cagnan

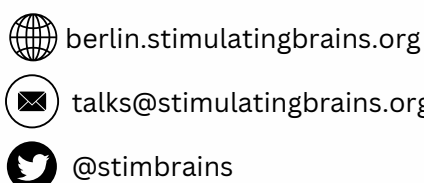

Therapies orchestrated by patients' own rhythms

- Registration is **free** & all are welcome: berlin.stimulatingbrains.org
- Up for a **science apéro with appetizers & beverages** prior to the talks, all on us? Join us **45 mins** early in the seminar room for a **meet & greet** with the speakers!
- Venue for all talks: **BCCN Lecture Hall**, Philippstraße 13, Haus 6, 10117 Berlin (Campus Mitte)

Learn more about our concept, our
speakers & find abstracts for all talks!
